*Based on a 12-week randomized, double-blind, placebo-controlled clinical study on 63 women and men ages 26 to 64 years old

‡Compared to placebo

We're Made Traceable®

100% of Ritual's active and other ingredients are Made Traceable™, meaning we publicly share the supplier name and nal place of manufacturing for our active and other ingredients. Because transparency is great, but traceability means more—it's the very core of our commitment to quality, safety, and efficacy, and it's how we empower women to make informed choices about what they put into their bodies.

Testing & Certifications

Each batch of HyaCera™ undergoes extensive third-party testing for heavy metals, microbes, and major allergens. We also test for purity and composition to ensure that what's on the label is what's in the product. That's why we not only conduct our own testing but also achieved Clean Label Project Certification.

The Clean Label Project is considered one of the strictest for protecting consumers from harmful contaminants. It independently tests for 200+ environmental contaminants and harmful chemicals, such as heavy metals (like lead and arsenic), pesticide residues, plasticizers, and antibiotic residues.
